## Certificates

CareerFoundry Full-Stack Immersion  
March 2021

## Technologies

### Markup & styling

HTML5, CSS, Bootstrap

### Front End Frameworks + libraries

React, Vue, Angular, jQuery

### Back End

Node.js, Express.js, SQL, MongoDB

### Other

Git, Heroku, Lambda AWS, Angular, Vue, Python

## Skills

Test-Driven

Version Control

Responsive Design

Web-Accessibility

Version Control

Figma prototyping

Kanban

JS Docs

## Project Experience

### Meet App

- Created a progressive web application (PWA) showing upcoming events in a user's area. using React Framework, Google Calender API and a serverless backend with AWS Lambda.
- Applied a test-driven development approach with Enzyme and Jest to ensure a stable code.
- Ensured application test coverage of  $\geq 90\%$ .

### MyFlix Movie

- Developed a full-stack application that allows users to create a profile, browse movies, favorite movies, explore genres and directors and update their profile using Node.js, JWT authentication, REST API and React.
- Created a single-page responsive application with routing, rich user interactions, several interface view and a polished user experience.
- Deployed API via Heroku and delivered API documentation for the endpoints as well as implementing Express.js and CORS.

### React Native Chat App, Chattown

- Created a mobile application enabling users to chat, share images and their location using React Native and Expo's gift-chat library with Google Firebase.
- Managed the project using a Kanban board to track tasks, user stories, story points and deliverables.
- Tested application by emulating end user devices using XCode and Android Studio and also physical hardware.

### Portfolio Website + Pokedex

- Created an index app for Pokémon using JavaScript, CSS and jQuery, which uses an external API.
- Created my portfolio website only using HTML, CSS with Bootstrap.

### Other projects built with Angular or Vue.js

- Completed a Quiz application used Angular and TypeScript (ES6) and data loaded from JSON files.
- Developed a simple ToDo application with Vue.js and Vue Material for visual design.

English

German

Spanish

## Professional Experience

### English Teacher Preschool

*September 2014—October 2015*

- Prepared and taught English lessons for Preschool and Kindergarten by using creative methods and – activities.

### Primary school teacher

OBS Het Oelebred (mentored by the program of Stenden University)

- Developed work schedules and lesson plans in accordance with curriculum objectives. Facilitated learning by building relationships with students, and created a positive learning environment in the classroom.
- Learned pedagogical and organizational skills at work while being mentored by Stenden University's program.

### Marketing and Sales Support

*September 2005— Februari 2009*

B&L Exhibits

- Managed relationships with (potential) customers with responsibility for marketing and sales of the displays unit.
- worked closely with a design agency to develop a new corporate website, self-taught HTML, planned newsletters, press releases, and hosted exhibition booths.

### Sales Support

*Februari 2003— September 2005*

The Missing Link Company (Now part of Ordina)

- Created a new sales support department and giving this function its own interpretation. Doubling of the team and division of tasks for more responsibilities for corporate marketing and communications.
